Equipment For Services

“Our relationship with PAETEC paid off. Their EFS program enabled us to procure \$70,000 in routing and security equipment with no upfront capital expense. The result is a design that offers us bulletproof redundancy for voice and data communications with low maintenance by our support staff. All this and we saved money over our previous provider.”

*Patti Consilvio
Director of Operations, Women First Healthcare*

dollar amounts in millions

Helping Your Business Succeed

PAETEC's passion for quality means fostering the success of our customers. We can help your business build a state-of-the-art communications infrastructure with more financial comfort than you ever thought possible. Accelerate your future with Equipment For Services from PAETEC.

Eliminate Capital Outlay

In modern business communications, keeping pace with the technology curve is difficult, and a modern data center can be an expensive proposition. But it's critical to your business image and your bottom line. PAETEC has developed an extraordinary profit-sharing program that can eliminate the costs of modernizing your aging telecommunications infrastructure. Now you can obtain what you need, when you need it, without advancing a large capital outlay.

Solutions Tailored to Your Business

Our communications specialists will partner with you to develop a flexible, bundled solution of competitive voice and data services, hardware, software, and network connectivity that precisely meets your business needs. PAETEC applies a credit to your network invoice to cover some or all of the purchase and installation of the necessary capital. You benefit from PAETEC's volume purchasing power, and obtain new equipment at little or no cost - ever.

Affordable Simplicity

You'll receive a single monthly bill for all of your local, long distance, Internet and telecommunications services and infrastructure at highly competitive rates that remain constant throughout the life of your contract. It's simple, straightforward, and affordable.

Too good to be true? Not at all. Discover Equipment For Services from PAETEC. It's too good to ignore.
